23. Problem: (use additional Sheets if necessary) When the files for a DPL insert are determined to be not in AMASS cache, the state of the action is updated in the database, but the ActionDriver does not re-dispatch the insert as a non-cache insert. These inserts will not get dispatched until the ActionDriver is bounced.

24. Proposed Solution: (use additional sheets if necessary) Deliver TE_6A.07_DPL.03 to all DAACs. TE must be installed on top on Patch_6A.07_DPL.02.

25. Alternate Solution: (use additional sheets if necessary) Continue bouncing ActionDriver server after inserts are done.

26. Consequences if Change(s) are not approved: (use additional sheets if necessary) DPL inserts will not get dispatched until the ActionDriver server is bounced.

27. Justification for Emergency (If Block 15 is "Emergency"): Fix is needed to complete Data Pool testing before promotion to OPS.
